Subject: Cabot/DEP are in

the news again this morning...oversight on DEP's part???? Also ethylene glycol breaks down within 10 days- DEP came out after our first test and did not find it...point is it entered our water well..also quantum lab has or had info on another chemical that was in our water "DEFAT THE SKIN" maybe the chemist will talk to you. Meanwhile Cabot continues to operate in this state despite their horrible track record. BTW our good friends brought water this weekend. NY
